

Student Success Story!

Name: Xiaoxiao Xiao
Hometown: Chengde, China
FDU Program: Bachelor of Science in Biology
Future Career: Medicine

Xiaoxiao's Story:

When I was in China, I applied to study in the USA but couldn't get a visa. Then I went to a school and they introduced FDU to me because it has campuses in the UK, Canada and the USA.

The English course helped me a lot and they also helped me get a visa for Canada! I studied at an English school in Vancouver. The teachers were really good! They were very helpful.

I entered FDU-Vancouver and studied Academic English in the Pre-University Program. This was really helpful for me! I learned to write university-level essays with advanced grammar, as well as learning academic reading skills. This was a great program to prepare me for university-level studies.

And at the same time, I was able to enroll in some first year university credit courses and start my degree.

I love living in Vancouver because of the excellent shopping, restaurants, and beaches. My friends are students from Canada and around the world and we get to spend lots of time together.

I then moved into the regular degree program at FDU-Vancouver and took a variety of first year courses. Then I decided to major in Biology and go to FDU New Jersey to finish my degree.

It was easy to get my USA visa in Vancouver after I had studied at FDU, because it is an American University. The staff at the Vancouver and New Jersey campuses helped me prepare all the documents for my visa application.

I'm looking forward to completing my degree at FDU in New Jersey and then continuing with a degree in medicine.

Thanks for everything, FDU!
